BERNINA⁺

BERNINA's new-look 630 and 640 sewing computers with built-in embroidery function offer tremendous performance coupled with the ultimate in ease of operation. Most functions are controlled quickly and intuitively via a large touchscreen and the new multi-function buttons.

The Favourite Function button, Personal Program, FHS Free-Hand System and built-in thread cutter are also enormously practical and time-saving. What's more, thanks to USB technology, both artista models are 'fit for the future', and optionally available with the world-first of BSR, which guarantees uniform stitch length even at variable speeds.

New!

BERNINA⁺

Point-by-point uniqueness!

Infinitely adjustable presser-foot pressure

Stepless control of presser-foot pressure lets you optimize and adjust the even fabric feed. This helps you achieve the perfect seam with all thicknesses of fabric, from coarse to delicate.

Stitch animation

The stitch animation lets you follow each sewing process stitch by stitch on the colour screen, and the pattern end is also indicated.

Start/stop button and Speed control

The start/stop button and the speed control: two enormously useful features. Now you can sew without a foot control – a real help with long seams and quilting work. The speed control lets you adjust sewing speed to your personal requirements.

Stock embroidery designs

The artista 630 and 640 have a choice of 70 and 90 stock designs respectively, including floral, quilting and children's designs. The ability to freely combine and edit designs and alphabets on-screen will give your creativity wings!

Large colour touchscreen

The touchscreen displays all the vital information in each menu: stitch width and length, presser-foot pressure, feed-dog and needle position. Animations in the user interface enable intuitive operation of the machine.

Separate winder motor

The speed-adjustable winding device helps you save time: with the artista, you can wind on bobbins as you sew, embroider or quilt, without having to interrupt your work. Winding speed can be adjusted via the multifunction buttons or the touchscreen.

BSR – BERNINA Stitch Regulator (optional)

The sensational world-first that makes free-motion quilting easy: the BERNINA Stitch Regulator, or BSR for short. This presser foot ensures uniform stitch length, even at variable sewing speed. The highlight of the presser foot: the BSR foot can even sew zigzag stitches.

Multifunction buttons

Sewing and embroidery made easy: The multifunction buttons let you adjust stitch length and width. In the embroidery area you can infinitely scale, position and rotate designs, as well as working with them in the tutorial. With the new user interface, all settings are instantly visible.

USB port and BERNINA USB memory stick (optional)

BERNINA utilizes the latest USB technology for swift and direct communication between your embroidery computer and PC. The optional BERNINA USB memory stick lets you carry out updates and save designs which you can then edit on your PC.

Thread cutter

With the artista 640, the thread end is automatically cut off after you finish embroidering a colour in a design. Needle and bobbin thread can also be cut simultaneously at the press of a button in the sewing, darning and quilting modes.

FHS Free-Hand System

A real BERNINA highlight: The knee-operated lifter lets you raise the presser foot and lower the feed dogs at the same time, leaving your hands free to guide the fabric.

CFL sewing light

The built-in BERNINA sewing light illuminates the sewing area around the needle with bright-as-day, shadow-free light

Setup

A stroke of genius: Security Program, brightness and colour of the touchscreen can be adjusted to your own personal needs.
